

## 1. Display Pattern

```
class DisplayPattern {  
    public static void main (String[] args) {  
        System.out.println ("  A  V  V  A");  
        System.out.println ("  AA  VV  AA");  
        System.out.println ("  A AAAA VV AAAAA");  
        System.out.println ("  A  A  V  A  A");  
    }  
}
```

## 2. Command Line

```
import java.text.DecimalFormat;

class commandLine {
    public static void main (String[] arg) {
        double width = Double.parseDouble(arg[0]);
        double height = Double.parseDouble(arg[1]);
        double area = width * height;
        DecimalFormat df = new DecimalFormat("0.000");
        System.out.println("Area: " + df.format(area));
    } }
```
